ALONG THESE LINES . . .

THANK YOU MEMBERS

By now MYEC has replaced the majority, if not all, of the meters that are on the Hysham Substation as well as many on the Sanders Substation. As was reported at MYEC's Annual Meeting and in the April issue of *Rural Montana*, the old meters have been replaced with AMR meters which are readable from the computer system at the office, and will no longer have to be read by the rural members. Each time a meter was changed out the electricity had to be turned off in order to do the exchange, so we want to thank our members for their patience while this process was taking place.

In the coming years, we will inform our members who are on the other substations when the linemen are changing out meters in your areas.

METER READING BOOKLETS

Meter reading booklets were mailed out in May. Please let us know if you didn't receive one, but would like to have one. Also, let us know if you are now entering your meter reading on-line and no longer need to have a booklet. We will then take you off of the list for next year. Thank you.

**Know what's below.
Call before you dig.**

This institution is an equal opportunity provider and employer.

Linemen, Trent Perkins and Brent Battenfeld, demonstrate about electrical safety to the students at the Hysham School during Ag Day on Tuesday, May 2.

MID-YELLOWSTONE ELECTRIC COOPERATIVE, INC.

P.I. Plug says, "Be smart about Fire and Electrical Safety!"

Keep your family, friends, and home safe by becoming a Safety Detective like P.I. Plug. Look for electrical and fire dangers and ask an adult to fix them. You'll be a real hero.

My name is P.I. Plug, and I'm a safety detective. I find electrical dangers and fire hazards in people's homes. If you want to help, you're in luck. Complete these classroom activities with your teacher to learn about fire and electrical hazards. Then ask an adult to help you find and remove hazards in your own home.

Unsafe	Safe
<p>Don't plug too many cords into one electrical outlet. If the outlet is too crowded with plugs, ask an adult for help to remove some of them.</p>	<p>As a family project, ask an adult to help you test smoke alarms once a month and replace the batteries once a year.</p>
<p>Never use electrical cords that are frayed or broken.</p>	<p>In case of smoke or fire, leave your home immediately. Call 911 from a safe place or neighbor's house.</p>
<p>Don't put things that can burn near light bulbs or other electrical devices that get hot.</p>	<p>Always turn off lights when you leave the house or go to bed.</p>
<p>Never place electronics or other electrical devices near liquids.</p>	<p>Keep things that can burn away from space heaters.</p>
