What is SmartHub®?

SmartHub is an app that allows you to manage all aspects of your electrical account online or with your mobile device.

It's quick and easy

This easy-to-use online and mobile billing and payment tool allows you to easily manage your account, pay your bill, monitor your electric use, report issues, and more with the touch of a button.

Two-way communication also allows your local electric cooperative to notify you about account and service issues and send customized messages directly to you.

SmartHub is available on Android and iOS smartphones and tablets, as well as online – and it takes less than three minutes to set up your account.

Be in the know

Do you have multiple accounts? On a prepaid service plan? Whether you're a landlord, mom of a family of four on a telecom family plan, or a utility customer, SmartHub lets you see detailed usage from all your accounts.

Use this information to stay within a budget, monitor tenant usage, manage energy efficiency, and more.

It's safe and secure

SmartHub provides a safe and secure environment for bill payments and transactions. Your information is just between you, your local electric cooperative, and your financial institution.
